

AI-NATIVE LAUNCHPAD · AGRICULTURE

Spot problems early. Waste less. Prove where food comes from.

An AI-native farm or co-op spots crop and animal problems sooner, keeps produce fresh on its way to market and has proof ready when buyers ask. Farmers still make the calls; AI does the watching and paperwork.

01
Know where to start
Find the AI opportunities that matter most to your business.

02
See it work
Pick one idea and we build a working proof of concept with you.

03
Know what comes next
Get a step-by-step roadmap with timeline, budget and estimated return.

AGRICULTURE · WHERE AI HELPS

From today's problems to AI-native work

THE PROBLEMS TODAY

01

Crop and herd problems spotted late

Pests, disease or stress are found once they have spread, when treatment costs more and yields have dropped.

02

Produce lost between farm and buyer

A cold room fails overnight or a truck runs late, and fresh produce is spoiled or rejected on arrival.

03

Proof that is hard to find

Buyers, certifiers and lenders ask for records, but they sit in registers, spreadsheets and phones.

WHERE AI CAN HELP

01	**Early crop health alerts**	Use satellite or drone images to flag fields that look stressed, so someone can check them sooner.
02	**Farmer advice in their language**	Answer common growing questions by phone or chat from trusted local guidance, in the local language.
03	**Cold room and transport watch**	Alert staff when storage or loads drift out of safe range, before produce is lost.
04	**Ready-made traceability**	Pull field, harvest and shipment records into one report when a buyer or certifier asks.
05	**Harvest and demand planning**	Match expected harvests with orders and transport, so less produce goes unsold.

FOR INSPIRATION

AI-native ideas to get you thinking

Examples only, to show what AI-native work can look like. They are not part of the package scope or a promise of what we will build; your POC is agreed with you.

The weekly field health check

TODAY

Field officers walk plots one by one and often find problems after they spread.

AI-NATIVE

A weekly list could rank fields that look stressed from satellite images, so officers visit those first.

The farmer helpline

TODAY

Farmers wait days for an adviser to answer a question about a pest or spray.

AI-NATIVE

A farmer could ask by voice or chat and get trusted local advice, with tricky cases passed to an agronomist.

The buyer's proof request

TODAY

Staff spend days gathering plot, harvest and shipment records for one buyer audit.

AI-NATIVE

A traceability pack could be pulled together from existing records in minutes, ready for staff to check.

- Budget and return-on-investment model
- Executive readout

WHAT YOU RECEIVE: 8 DELIVERABLES

01 **AI readiness scorecard**
02 **Opportunity map**
03 **Ranked use cases**
04 **One working proof of concept**
05 **AI-native roadmap**
06 **Budget and ROI model**
07 **AI governance starter kit**
08 **Executive readout**

PROOF OF CONCEPT

You choose the proof of concept

Pick one of our suggested ideas for your industry, or bring your own business problem. We check that it fits the package, agree what success looks like in writing, then build it with you.

Good to know: A proof of concept shows an idea working on real or sample data. It is not a production system; we scope the production version with you as a next step.

LAUNCH · $2,500

Farmer advice assistant

An assistant that answers common growing and animal-care questions from your own guides, with hard cases sent to an expert.

SUCCESS MEASURE
Farmer questions answered the same day

ACCELERATE · $7,500

Cold room and load alerts

Alerts from temperature sensors in one packhouse or fleet, sent to staff with the reason and suggested action.

SUCCESS MEASURE
Produce lost to temperature problems at one site

TRANSFORM · $19,500

Farm-to-buyer traceability desk

One view linking field, harvest, storage, transport and payment records across members, ready for buyer and lender checks.

SUCCESS MEASURE
Time to answer a buyer or certifier request

INCLUDED IN EVERY PACKAGE

Any one product, free for 3 months

Pick any live product from the Burdenoff portfolio and use it free for 90 days.

- One product per organisation
- 90 days in a row from activation
- Agreed seats and usage
- No automatic paid renewal
- Export your data at the end

GOOD FITS FOR AGRICULTURE

Healthy Bowl	Run farms, crops and agri-food records in one place built for growers and co-ops.
MoveTheWheels	Plan collection, storage and delivery of fresh produce with AI route and stock help.
AssetHandler	Track cold rooms, tractors and equipment with maintenance history.

AGRICULTURE · THE ROAD AHEAD

Your road to AI-native

STEP ONE: THE LAUNCHPAD

NEXT STEPS WE CAN TAKE TOGETHER

Months count from the end of your Launchpad.

NOW · 3–10 WEEKS

Launchpad

Map where losses and paperwork cost you most, prove one idea on real data and agree a costed roadmap.

NEXT · MONTHS 1–3

Roll out the first win

Take the proven idea into daily use across more farms, sites or members, with training and clear owners.

THEN · MONTHS 4–9

Connect farm to market

Link field, storage, transport and payment records so everyone works from the same picture.

LATER · MONTHS 10–18

Run AI-native

AI helpers become part of each season's work, measured and improved after each harvest.

> The Launchpad is step one: it shows the real value of going AI-native in your own business. Rolling out, scaling and running AI day to day are later steps. You decide if and when to take them, with us or anyone else.

THE FIRST 100 DAYS

Your package takes 3–10 weeks of this. The rest is your team trying the POC, deciding and preparing, with our 30-day follow-up.

DAYS 1–15

Discover

Talk to your people, measure today's costs and check AI readiness.

DAYS 16–30

Prioritise

Pick the highest-value ideas, review the risks and agree the POC.

DAYS 31–60

Prove

Build and test the proof of concept with your team.

DAYS 61–75

Plan

Finish the roadmap, budget, operating model and estimated return.

DAYS 76–100

Decide

Review results, train owners and choose what to invest in next.

HOW WE MEASURE SUCCESS

- **Time to spot crop or herd problems**
- **Produce lost after harvest**
- **Time to answer buyer and certifier requests**
- **Farmer questions answered the same day**

HANDLE WITH CARE

- An agronomist or vet signs off advice on chemicals, medicines and animal treatment.
- Agree who owns farm and member data, get consent before sharing it and keep it out of public AI tools.

YOUR PROTECTIONS

- ✓ **Fixed fee for an agreed scope**
- ✓ **Written success criteria for the POC**
- ✓ **A named engagement lead**
- ✓ **Weekly progress updates**
- ✓ **Your data rights written into the contract**
- ✓ **Tool advice based on fit, not on what we sell**
- ✓ **No access to live systems without your approval**
- ✓ **Clear exit and data export at any point**
