

AI-NATIVE LAUNCHPAD · AUTOMOTIVE & MOBILITY

Fewer parts surprises. More vehicles on the road.

An AI-native automotive business spots parts shortages, quality issues and idle vehicles sooner. AI watches the data and drafts next steps; people make the calls.

01
Know where to start
Find the AI opportunities that matter most to your business.

02
See it work
Pick one idea and we build a working proof of concept with you.

03
Know what comes next
Get a step-by-step roadmap with timeline, budget and estimated return.

AUTOMOTIVE & MOBILITY · WHERE AI HELPS

From today's problems to AI-native work

THE PROBLEMS TODAY

01

Late parts that stop the line

One late truck or short delivery can halt assembly, while planners chase suppliers by phone and email.

02

Quality issues found too late

A suspect batch is spotted after vehicles have shipped, so finding and fixing the affected ones is slow and costly.

03

Vehicles waiting for service

Fleet vans and customer cars sit idle waiting for parts, bays or a qualified technician, losing money every day.

WHERE AI CAN HELP

01	**Parts shortage alerts**	Warn planners early when an inbound part is late or running low, with options to cover it.
02	**Faster quality containment**	Trace which vehicles or batches a problem affects, so the team can act quickly.
03	**Service and repair assistant**	Let technicians ask about faults and fixes and get answers from your own manuals and past repairs.
04	**Fleet uptime planning**	Plan servicing around demand and parts so fewer vehicles sit off the road.
05	**Customer booking and updates**	Handle service bookings and progress updates by chat, with staff stepping in for problems.

FOR INSPIRATION

AI-native ideas to get you thinking

Examples only, to show what AI-native work can look like. They are not part of the package scope or a promise of what we will build; your POC is agreed with you.

The parts coverage board

TODAY

Planners check supplier emails and stock reports by hand to see what might run short.

AI-NATIVE

A board could show which parts are at risk for the next few shifts, why, and the options to cover each one.

Containing a suspect batch

TODAY

Quality teams pull build and shipping records from several systems to trace a bad part.

AI-NATIVE

The team could ask which vehicles got the suspect batch and get a draft list quickly, for the team to check and act on.

A suggested daily workshop plan

TODAY

Service desks juggle bookings, parts and technicians on whiteboards and phone calls.

AI-NATIVE

A suggested daily plan could match jobs to bays, parts and qualified technicians, for the service manager to adjust.

AUTOMOTIVE & MOBILITY · THREE PACKAGES

Your Launchpad

FIXED FEE, AGREED SCOPE	Launch $2,500 Small businesses 1–50 employees · 3–4 weeks	MOST POPULAR Accelerate $7,500 Growing companies 51–500 employees · 5–6 weeks	Transform $19,500 Larger organisations 501+ employees · 8–10 weeks

EVERY PACKAGE INCLUDES

- AI-native consultancy and roadmap
- One proof of concept you choose
- One Burdenoff product free for 3 months
- Budget and return-on-investment model
- Executive readout

WHAT YOU RECEIVE: 8 DELIVERABLES

01 **AI readiness scorecard**
02 **Opportunity map**
03 **Ranked use cases**
04 **One working proof of concept**
05 **AI-native roadmap**
06 **Budget and ROI model**
07 **AI governance starter kit**
08 **Executive readout**

PROOF OF CONCEPT

You choose the proof of concept

Pick one of our suggested ideas for your industry, or bring your own business problem. We check that it fits the package, agree what success looks like in writing, then build it with you.

Good to know: A proof of concept shows an idea working on real or sample data. It is not a production system; we scope the production version with you as a next step.

LAUNCH · $2,500

Workshop knowledge assistant

An assistant that answers technician and service-desk questions from your manuals, bulletins and past repair notes.

SUCCESS MEASURE
Time to diagnose common faults

ACCELERATE · $7,500

Inbound parts early warning

Alerts built from your planning or supplier data for one plant or parts family, with the reason and options to cover.

SUCCESS MEASURE
Shortages spotted before they stop work

TRANSFORM · $19,500

Plant-to-fleet operations desk

One view across parts, quality, fleet and service that ranks issues and suggests the next best action for each team.

SUCCESS MEASURE
Line stops, vehicles off road and time to contain issues

INCLUDED IN EVERY PACKAGE

Any one product, free for 3 months

Pick any live product from the Burdenoff portfolio and use it free for 90 days.

- One product per organisation
- 90 days in a row from activation
- Agreed seats and usage
- No automatic paid renewal
- Export your data at the end

GOOD FITS FOR AUTOMOTIVE & MOBILITY

MoveTheWheels	Track inbound parts orders, stock and vehicle transport in one place, with AI help on planning.
ManufacturedOps	Run production and shop-floor operations for a growing plant in one place.
AssetHandler	Track vehicles, tools and workshop equipment, with work orders and a full audit trail.

ALGOSHRED TECHNOLOGIES

AUTOMOTIVE & MOBILITY · THE ROAD AHEAD

Your road to AI-native

STEP ONE: THE LAUNCHPAD | NEXT STEPS WE CAN TAKE TOGETHER

Months count from the end of your Launchpad.

NOW · 3–10 WEEKS

Launchpad

Map your biggest time and cost leaks, prove one idea on real plant, fleet or workshop data and agree a costed roadmap.

NEXT · MONTHS 1–3

Roll out the first win

Take the proven idea into daily use at more sites or workshops, with training and clear owners.

THEN · MONTHS 4–9

Connect the operation

Link parts, production, quality, fleet and service data so every team works from the same picture.

LATER · MONTHS 10–18

Run AI-native

AI helpers become part of daily plant, fleet and workshop work, measured and improved each month.

> The Launchpad is step one: it shows the real value of going AI-native in your own business. Rolling out, scaling and running AI day to day are later steps. You decide if and when to take them, with us or anyone else.

THE FIRST 100 DAYS

Your package takes 3–10 weeks of this. The rest is your team trying the POC, deciding and preparing, with our 30-day follow-up.

DAYS 1–15

Discover

Talk to your people, measure today's costs and check AI readiness.

DAYS 16–30

Prioritise

Pick the highest-value ideas, review the risks and agree the POC.

DAYS 31–60

Prove

Build and test the proof of concept with your team.

DAYS 61–75

Plan

Finish the roadmap, budget, operating model and estimated return.

DAYS 76–100

Decide

Review results, train owners and choose what to invest in next.

HOW WE MEASURE SUCCESS

- **Line stops caused by parts**
- **Time to contain a quality issue**
- **Vehicles off the road waiting for service**
- **First-time fix rate in the workshop**

HANDLE WITH CARE

- Keep a qualified person in charge of any decision about vehicle safety, recalls or high-voltage work.
- Agree who can see driver, vehicle and location data, and keep it out of public AI tools.
- Check AI repair suggestions against the manufacturer's procedures before any work starts.

YOUR PROTECTIONS

- ✓ **Fixed fee for an agreed scope**
- ✓ **Written success criteria for the POC**
- ✓ **A named engagement lead**
- ✓ **Weekly progress updates**
- ✓ **Your data rights written into the contract**
- ✓ **Tool advice based on fit, not on what we sell**
- ✓ **No access to live systems without your approval**
- ✓ **Clear exit and data export at any point**
