

AI-NATIVE LAUNCHPAD · CONSTRUCTION

Fewer surprises on site. Plans the whole job trusts.

An AI-native contractor sees missing crews, idle machines and late deliveries early, before they hold up the job. AI checks the plan, reads the paperwork and drafts the reports, while your people run the site.

01
Know where to start
Find the AI opportunities that matter most to your business.

02
See it work
Pick one idea and we build a working proof of concept with you.

03
Know what comes next
Get a step-by-step roadmap with timeline, budget and estimated return.

FIXED-FEE PACKAGES

CONSTRUCTION · WHERE AI HELPS

From today’s problems to AI-native work

THE PROBLEMS TODAY

01

The wrong crew on the wrong day

Workers arrive without the right cards or skills, or the crew is short, so the job stalls and the plan slips.

02

Deliveries the site can’t take

Materials turn up early, late or all at once, blocking the gate and leaving crews waiting or stock lying in the rain.

03

Reports built by hand every month

Project managers copy progress, costs and photos from many places into reports, losing hours each week.

WHERE AI CAN HELP

01	**Lookahead checks**	Check the next few weeks of work against crews, machines and deliveries and flag the gaps early.
02	**Document and drawing assistant**	Let teams ask questions of specs, drawings and contracts and get answers with the source.
03	**Site diary and progress drafts**	Turn photos, voice notes and logs into daily diaries and progress reports for review.
04	**Bid and estimate support**	Pull quantities and past costs together faster so estimators can focus on judgement.
05	**Plant and machine tracking**	Show which machines are idle, due a service or needed elsewhere.

FOR INSPIRATION

AI-native ideas to get you thinking

Examples only, to show what AI-native work can look like. They are not part of the package scope or a promise of what we will build; your POC is agreed with you.

The Monday crew readiness board

TODAY

Site managers ring around on Sunday night to check who is turning up and with which cards.

AI-NATIVE

A board could show each job’s crew for the week, with expired cards and short shifts flagged before Monday.

Ask the spec on site

TODAY

Foremen call the office or search long PDFs to check a detail or tolerance.

AI-NATIVE

A foreman could ask a phone in plain words and get the answer from the project’s own specs, with the page shown.

The month-end report, first draft

TODAY

Project managers spend days pulling progress, costs and photos into the monthly report.

AI-NATIVE

A first draft could pull progress, cost and photos together, ready for the project manager to check and add judgement.

CONSTRUCTION · THREE PACKAGES

Your Launchpad

FIXED FEE, AGREED SCOPE	Launch **$2,500** Small businesses 1–50 employees · 3–4 weeks	MOST POPULAR Accelerate **$7,500** Growing companies 51–500 employees · 5–6 weeks	Transform **$19,500** Larger organisations 501+ employees · 8–10 weeks

- Executive readout

WHAT YOU RECEIVE: 8 DELIVERABLES

01 **AI readiness scorecard**
02 **Opportunity map**
03 **Ranked use cases**
04 **One working proof of concept**
05 **AI-native roadmap**
06 **Budget and ROI model**
07 **AI governance starter kit**
08 **Executive readout**

PROOF OF CONCEPT

You choose the proof of concept

Pick one of our suggested ideas for your industry, or bring your own business problem. We check that it fits the package, agree what success looks like in writing, then build it with you.

Good to know: A proof of concept shows an idea working on real or sample data. It is not a production system; we scope the production version with you as a next step.

LAUNCH · $2,500

Project documents assistant

An assistant that answers questions from one project's specs, drawings list and contract, with the source shown each time.

SUCCESS MEASURE
Time to answer common site questions

ACCELERATE · $7,500

Daily diary and progress drafts

Daily diaries and weekly progress drafts built from site photos and notes, connected to your project system.

SUCCESS MEASURE
Hours spent writing site reports each week

TRANSFORM · $19,500

Portfolio lookahead desk

One view across jobs that checks crews, plant and deliveries against each lookahead and suggests fixes before work stalls.

SUCCESS MEASURE
Planned tasks started on the day and delay hours

INCLUDED IN EVERY PACKAGE

Any one product, free for 3 months

Pick any live product from the Burdenoff portfolio and use it free for 90 days.

- One product per organisation
- 90 days in a row from activation
- Agreed seats and usage
- No automatic paid renewal
- Export your data at the end

GOOD FITS FOR CONSTRUCTION

PlanMagnet	Plan jobs, milestones and lookaheads with AI help in one shared plan.
CrewFoundry	Hire and onboard site crews and keep their training records in one place.
AssetHandler	Track plant, tools and machines across sites, with service history and work orders.

ALGOSHRED TECHNOLOGIES

CONSTRUCTION · THE ROAD AHEAD

Your road to AI-native

STEP ONE: THE LAUNCHPAD

NEXT STEPS WE CAN TAKE TOGETHER

Months count from the end of your Launchpad.

NOW · 3–10 WEEKS

Launchpad

Map where jobs lose the most time and money, prove one idea on a real project and agree a costed roadmap.

NEXT · MONTHS 1–3

Roll out the first win

Take the proven idea onto more jobs, with training for site and office teams and clear owners.

THEN · MONTHS 4–9

Connect the jobs

Link planning, crews, plant, deliveries and cost data so site and office work from one picture.

LATER · MONTHS 10–18

Run AI-native

AI helpers become part of daily work from bid to handover, measured and improved each month.

> The Launchpad is step one: it shows the real value of going AI-native in your own business. Rolling out, scaling and running AI day to day are later steps. You decide if and when to take them, with us or anyone else.

THE FIRST 100 DAYS

Your package takes 3–10 weeks of this. The rest is your team trying the POC, deciding and preparing, with our 30-day follow-up.

DAYS 1–15

Discover

Talk to your people, measure today's costs and check AI readiness.

DAYS 16–30

Prioritise

Pick the highest-value ideas, review the risks and agree the POC.

DAYS 31–60

Prove

Build and test the proof of concept with your team.

DAYS 61–75

Plan

Finish the roadmap, budget, operating model and estimated return.

DAYS 76–100

Decide

Review results, train owners and choose what to invest in next.

HOW WE MEASURE SUCCESS

- **Planned tasks started on the day**
- **Hours spent on site reports**
- **Machine idle time**
- **Delays caused by deliveries or crews**

HANDLE WITH CARE

- Keep a competent person in charge of every decision that affects site safety or structural design.
- Agree who can see drawings, bids and contract data, and keep it out of public AI tools.
- The assistant must answer only from current drawing and spec revisions, and a person checks anything built from it.

YOUR PROTECTIONS

- ✓ **Fixed fee for an agreed scope**
- ✓ **Written success criteria for the POC**
- ✓ **A named engagement lead**
- ✓ **Weekly progress updates**
- ✓ **Your data rights written into the contract**
- ✓ **Tool advice based on fit, not on what we sell**
- ✓ **No access to live systems without your approval**
- ✓ **Clear exit and data export at any point**
