

AI-NATIVE LAUNCHPAD · DENTAL CLINICS

Fewer empty chairs. Less admin. More time for patients.

An AI-native clinic fills more of its diary, answers routine patient questions at any hour and cuts the typing in notes and claims. Dentists and clinicians still make every care decision; AI handles the reminders, forms and follow-ups.

01

Know where to start

Find the AI opportunities that matter most to your business.

02

See it work

Pick one idea and we build a working proof of concept with you.

03

Know what comes next

Get a step-by-step roadmap with timeline, budget and estimated return.

FIXED-FEE PACKAGES

Launch **$2,500**

Accelerate **$7,500**

Transform **$19,500**

DENTAL CLINICS · WHERE AI HELPS

From today's problems to AI-native work

THE PROBLEMS TODAY

01

Missed appointments and empty chairs

Patients forget or cancel late, the chair sits empty and the gap is hard to fill at short notice.

02

Front desk stuck on the phone

Reception spends the day on bookings, reminders and the same questions, while patients wait at the counter.

03

Notes, claims and plans by hand

Clinicians type notes after hours and staff chase insurance forms, so treatment plans stall and payments arrive late.

WHERE AI CAN HELP

01	**Reminders and waiting lists**	Send reminders patients can confirm or rebook by text, and offer freed-up slots to people on the waiting list.
02	**Patient question assistant**	Answer common questions on prices, aftercare and opening hours by chat, day or night, from your own guidance.
03	**Faster clinical notes**	Turn a clinician's short dictation into a tidy draft note for them to check and sign.
04	**Treatment plan follow-up**	Spot patients with accepted plans who have not booked, and nudge them with a friendly reminder.
05	**Claims and paperwork help**	Pre-fill insurance and referral forms from the patient record so staff only check and send.

FOR INSPIRATION

AI-native ideas to get you thinking

Examples only, to show what AI-native work can look like. They are not part of the package scope or a promise of what we will build; your POC is agreed with you.

Filling a late cancellation

TODAY

Reception rings down a list of patients hoping someone can come in within the hour.

AI-NATIVE

The clinic could send the slot to waiting-list patients by text, and the first to accept could be booked straight in.

The after-hours aftercare question

TODAY

A patient worried after an extraction leaves a voicemail that waits until morning.

AI-NATIVE

An assistant could share the clinic's approved aftercare guide and pass anything that sounds urgent to the on-call clinician.

Notes done before the next patient

TODAY

The dentist types notes at the end of the day from memory.

AI-NATIVE

A draft note could be ready from a short dictation, so the dentist checks and signs it between patients.

DENTAL CLINICS · THREE PACKAGES

Your Launchpad

- Executive readout

WHAT YOU RECEIVE: 8 DELIVERABLES

01 AI readiness scorecard
02 Opportunity map
03 Ranked use cases
04 One working proof of concept
05 AI-native roadmap
06 Budget and ROI model
07 AI governance starter kit
08 Executive readout

PROOF OF CONCEPT

You choose the proof of concept

Pick one of our suggested ideas for your industry, or bring your own business problem. We check that it fits the package, agree what success looks like in writing, then build it with you.

Good to know: A proof of concept shows an idea working on real or sample data. It is not a production system; we scope the production version with you as a next step.

LAUNCH · $2,500

Patient question and booking assistant

A chat assistant on your website that answers common questions from your own guidance and passes booking requests to reception.

SUCCESS MEASURE
Routine questions answered without a call and booking requests captured

ACCELERATE · $7,500

No-show and waiting-list filler

Reminders and a waiting-list offer linked to your practice diary, so freed-up slots are offered to patients automatically.

SUCCESS MEASURE
No-show rate and empty chair time

TRANSFORM · $19,500

Patient follow-up view across sites

One view across sites of bookings, unbooked treatment plans and pending claims, with suggested next steps for each team.

SUCCESS MEASURE
Plan completion rate and days to get paid

INCLUDED IN EVERY PACKAGE

Any one product, free for 3 months

Pick any live product from the Burdenoff portfolio and use it free for 90 days.

- One product per organisation
- 90 days in a row from activation
- Agreed seats and usage
- No automatic paid renewal
- Export your data at the end

GOOD FITS FOR DENTAL CLINICS

BotManor	Answer patient questions on prices, aftercare and bookings from your own approved guidance.
FluidGrids	Automate reminders, recall letters and claim follow-ups with fewer manual steps.
BigConsole	See chair use, no-shows and plan uptake across clinicians and sites in one dashboard.

ALGOSHRED TECHNOLOGIES

DENTAL CLINICS · THE ROAD AHEAD

Your road to AI-native

STEP ONE: THE LAUNCHPAD

NEXT STEPS WE CAN TAKE TOGETHER

Months count from the end of your Launchpad.

NOW · 3–10 WEEKS

Launchpad

Map where your clinic loses time and chair hours, prove one idea on real data and agree a costed roadmap.

NEXT · MONTHS 1–3

Roll out the first win

Put the proven idea into daily use at the front desk or in the surgery, with training and clear owners.

THEN · MONTHS 4–9

Connect the clinic

Link the diary, patient records, payments and claims so reception and clinicians work from one picture.

LATER · MONTHS 10–18

Run AI-native

Make AI helpers part of daily front-desk and follow-up work, measured and improved each month.

> The Launchpad is step one: it shows the real value of going AI-native in your own business. Rolling out, scaling and running AI day to day are later steps. You decide if and when to take them, with us or anyone else.

THE FIRST 100 DAYS

Your package takes 3–10 weeks of this. The rest is your team trying the POC, deciding and preparing, with our 30-day follow-up.

DAYS 1–15

Discover

Talk to your people, measure today's costs and check AI readiness.

DAYS 16–30

Prioritise

Pick the highest-value ideas, review the risks and agree the POC.

DAYS 31–60

Prove

Build and test the proof of concept with your team.

DAYS 61–75

Plan

Finish the roadmap, budget, operating model and estimated return.

DAYS 76–100

Decide

Review results, train owners and choose what to invest in next.

HOW WE MEASURE SUCCESS

- **No-show and late cancellation rate**
- **Chair time used each day**
- **Treatment plans accepted and completed**
- **Clinician time spent on notes**

HANDLE WITH CARE

- Keep patient records private and out of public AI tools, and get consent before any consultation is recorded.
- A clinician checks and signs every note, plan and piece of clinical advice before it is used.
- Urgent symptoms raised in chat go straight to a person rather than the assistant.

YOUR PROTECTIONS

- ✓ **Fixed fee for an agreed scope**
- ✓ **Written success criteria for the POC**
- ✓ **A named engagement lead**
- ✓ **Weekly progress updates**
- ✓ **Your data rights written into the contract**
- ✓ **Tool advice based on fit, not on what we sell**
- ✓ **No access to live systems without your approval**
- ✓ **Clear exit and data export at any point**
