

AI-NATIVE LAUNCHPAD · ENERGY & UTILITIES

Fewer breakdowns. Fewer wasted trips. Reports on time.

An AI-native operator spots failing equipment early, keeps compliance records up to date and sends the right crew to the right site. People stay in charge of safety and the big calls; AI does the watching and the paperwork.

01
Know where to start
Find the AI opportunities that matter most to your business.

02
See it work
Pick one idea and we build a working proof of concept with you.

03
Know what comes next
Get a step-by-step roadmap with timeline, budget and estimated return.

ENERGY & UTILITIES · WHERE AI HELPS

From today's problems to AI-native work

THE PROBLEMS TODAY

01

Repeat failures on critical equipment

The same pumps, compressors or turbines trip again and again, cutting output while crews travel out to remote sites.

02

Compliance records kept by hand

Emissions, water and permit readings are gathered from logs and spreadsheets, so gaps show up late or at an inspection.

03

Crews and permits out of step

Work is planned before checking who is qualified and in date, so jobs stall on the day or the wrong team turns up.

WHERE AI CAN HELP

01	**Equipment health alerts**	Flag machines that are drifting from normal so they can be fixed in a planned stop.
02	**Compliance record helper**	Gather readings, spot missing data and draft reports for a person to check and sign.
03	**Smarter crew scheduling**	Match jobs to people with the right qualifications, location and availability.
04	**Field assistant**	Let technicians look up procedures and past job notes and get answers with the source document.
05	**Site security watch**	Sort alarms and camera events at remote sites so staff see the ones that matter first.

FOR INSPIRATION

AI-native ideas to get you thinking

Examples only, to show what AI-native work can look like. They are not part of the package scope or a promise of what we will build; your POC is agreed with you.

The repeat-failure brief

TODAY

Engineers pull trip logs from several systems each week to work out what keeps failing.

AI-NATIVE

A weekly brief could rank the equipment costing the most lost output, with the likely cause and the history behind it.

The draft compliance report

TODAY

Staff copy readings from field sheets into a report template before each deadline.

AI-NATIVE

A draft could be ready to review, with missing readings and out-of-limit values highlighted for a person to check.

The shutdown crew check

TODAY

Planners check training records by hand before a shutdown, often at the last minute.

AI-NATIVE

Planners could see who is qualified, in date and nearby for each job, with gaps flagged weeks ahead.

ENERGY & UTILITIES · THREE PACKAGES

Your Launchpad

FIXED FEE, AGREED SCOPE	Launch **$2,500** Small businesses 1–50 employees · 3–4 weeks	MOST POPULAR Accelerate **$7,500** Growing companies 51–500 employees · 5–6 weeks	Transform **$19,500** Larger organisations 501+ employees · 8–10 weeks

EVERY PACKAGE INCLUDES

- AI-native consultancy and roadmap
- One proof of concept you choose
- One Burdenoff product free for 3 months
- Budget and return-on-investment model
- Executive readout

WHAT YOU RECEIVE: 8 DELIVERABLES

01 **AI readiness scorecard**
02 **Opportunity map**
03 **Ranked use cases**
04 **One working proof of concept**
05 **AI-native roadmap**
06 **Budget and ROI model**
07 **AI governance starter kit**
08 **Executive readout**

PROOF OF CONCEPT

You choose the proof of concept

Pick one of our suggested ideas for your industry, or bring your own business problem. We check that it fits the package, agree what success looks like in writing, then build it with you.

Good to know: A proof of concept shows an idea working on real or sample data. It is not a production system; we scope the production version with you as a next step.

LAUNCH · $2,500

Field procedures assistant

An assistant that answers questions from your operating procedures and past job notes, so field staff find the approved steps faster.

SUCCESS MEASURE
Time to find the right procedure in the field

ACCELERATE · $7,500

Early-warning equipment alerts

Alerts built from sensor or maintenance data for one site or asset type, sent to the reliability team with the reason.

SUCCESS MEASURE
Unplanned trips and alert accuracy on one site

TRANSFORM · $19,500

Operations and compliance desk

One view across reliability, production, compliance and crews that spots issues early and suggests next steps for people to decide on.

SUCCESS MEASURE
Lost output hours and compliance gaps found early

INCLUDED IN EVERY PACKAGE

Any one product, free for 3 months

Pick any live product from the Burdenoff portfolio and use it free for 90 days.

- One product per organisation
- 90 days in a row from activation
- Agreed seats and usage
- No automatic paid renewal
- Export your data at the end

GOOD FITS FOR ENERGY & UTILITIES

TheGlobalFuel	Run fuel, resource and mineral operations, with production and ESG data in one place.
AssetHandler	Track pumps, turbines and plant, with work orders and maintenance history.
EcoImpactHub	Keep emissions, water and environmental records tidy and ready for reporting.

ENERGY & UTILITIES · THE ROAD AHEAD

Your road to AI-native

STEP ONE: THE LAUNCHPAD

NEXT STEPS WE CAN TAKE TOGETHER

Months count from the end of your Launchpad.

NOW · 3–10 WEEKS

Launchpad

Map your biggest time, cost and risk leaks, prove one idea on real site data and agree a costed roadmap.

NEXT · MONTHS 1–3

Roll out the first win

Take the proven idea into daily use at more sites or asset types, with training and clear owners.

THEN · MONTHS 4–9

Connect operations

Link maintenance, production, compliance and crew data so every team works from the same picture.

LATER · MONTHS 10–18

Run AI-native

AI helpers become part of daily operations and reporting, measured and improved each month.

> The Launchpad is step one: it shows the real value of going AI-native in your own business. Rolling out, scaling and running AI day to day are later steps. You decide if and when to take them, with us or anyone else.

THE FIRST 100 DAYS

Your package takes 3–10 weeks of this. The rest is your team trying the POC, deciding and preparing, with our 30-day follow-up.

DAYS 1–15

Discover

Talk to your people, measure today's costs and check AI readiness.

DAYS 16–30

Prioritise

Pick the highest-value ideas, review the risks and agree the POC.

DAYS 31–60

Prove

Build and test the proof of concept with your team.

DAYS 61–75

Plan

Finish the roadmap, budget, operating model and estimated return.

DAYS 76–100

Decide

Review results, train owners and choose what to invest in next.

HOW WE MEASURE SUCCESS

- **Unplanned downtime and lost output**
- **Repeat failures on critical equipment**
- **Compliance reports completed on time**
- **Jobs started on the planned day**

HANDLE WITH CARE

- Keep a qualified person in charge of any decision that affects worker safety, isolation or plant shutdown.
- Have a person check and sign every compliance or regulator report before it is sent.
- Treat site and control-system data as sensitive, keep it out of public AI tools and keep AI away from live plant controls.

YOUR PROTECTIONS

- ✓ **Fixed fee for an agreed scope**
- ✓ **Written success criteria for the POC**
- ✓ **A named engagement lead**
- ✓ **Weekly progress updates**
- ✓ **Your data rights written into the contract**
- ✓ **Tool advice based on fit, not on what we sell**
- ✓ **No access to live systems without your approval**
- ✓ **Clear exit and data export at any point**
