

AI-NATIVE LAUNCHPAD · HEALTHCARE PROVIDERS

# Less admin. Smoother patient flow. More time for patients.

An AI-native clinic or hospital clears paperwork, answers routine patient questions and spots bottlenecks early, alongside the systems you already run. Clinicians still make every care decision; AI handles the sorting and admin.

HEALTHCARE PROVIDERS · WHERE AI HELPS

# From today's problems to AI-native work

## THE PROBLEMS TODAY

01

### Delays that back up the whole day

A late discharge holds a bed, patients wait longer and the whole day backs up, while staff chase updates by phone.

02

### Staff buried in admin

Clinicians and front-desk teams spend hours on notes, forms, referrals and follow-up calls instead of with patients.

03

### Missed appointments and patient messages

Prep questions go unanswered, reminders are missed and no-shows leave gaps in already stretched schedules.

## WHERE AI CAN HELP

| | | |
|---|---|---|
| 01 | **Patient message helper** | Answer routine questions about prep, directions and bookings, and pass anything clinical to a person. |
| 02 | **Smarter reminders and rebooking** | Send timely reminders and offer freed-up slots to waiting patients, so fewer appointments go empty. |
| 03 | **Faster notes and letters** | Draft referral letters, discharge summaries and forms for a clinician to check and sign. |
| 04 | **Live patient-flow view** | Show where beds, rooms and patients are held up today, so managers can act before queues build. |
| 05 | **Staffing and equipment watch** | Flag shifts likely to run short and equipment that is overdue for checks, before it causes delays. |

FOR INSPIRATION

## AI-native ideas to get you thinking

Examples only, to show what AI-native work can look like. They are not part of the package scope or a promise of what we will build; your POC is agreed with you.

### The pre-visit question desk

TODAY

Front-desk staff field the same calls about fasting, parking and paperwork all day.

AI-NATIVE

A patient could message any time and get clear prep answers from the clinic's own guides, with clinical questions sent to a nurse.

### The discharge letter, drafted

TODAY

A doctor types each discharge summary at the end of a long shift.

AI-NATIVE

A draft could be ready from the patient's notes when the doctor opens the record, to review, correct and sign.

### The morning bed and staffing huddle

TODAY

Managers piece together beds, staffing and expected discharges from calls and whiteboards.

AI-NATIVE

A one-page brief could show likely discharges, pinch points and short shifts before the huddle starts.

## PROOF OF CONCEPT

### You choose the proof of concept

Pick one of our suggested ideas for your industry, or bring your own business problem. We check that it fits the package, agree what success looks like in writing, then build it with you.

**Good to know:** A proof of concept shows an idea working on real or sample data. It is not a production system; we scope the production version with you as a next step.

HEALTHCARE PROVIDERS · THE ROAD AHEAD

# Your road to AI-native

STEP ONE: THE LAUNCHPAD

NEXT STEPS WE CAN TAKE TOGETHER

Months count from the end of your Launchpad.

NOW · 3–10 WEEKS

### Launchpad

Map where admin and waiting cost you most, prove one idea on approved, safely handled data and agree a costed roadmap.

NEXT · MONTHS 1–3

### Roll out the first win

Take the proven idea into daily use across more clinics or departments, with training and clear owners.

THEN · MONTHS 4–9

### Connect care operations

Link bookings, beds, staffing and equipment data so every team works from the same picture.

LATER · MONTHS 10–18

### Run AI-native

AI helpers become part of daily work, with clinicians in charge, measured and improved each month.

> The Launchpad is step one: it shows the real value of going AI-native in your own business. Rolling out, scaling and running AI day to day are later steps. You decide if and when to take them, with us or anyone else.

## THE FIRST 100 DAYS

Your package takes 3–10 weeks of this. The rest is your team trying the POC, deciding and preparing, with our 30-day follow-up.

DAYS 1–15

**Discover**

Talk to your people, measure today's costs and check AI readiness.

DAYS 16–30

**Prioritise**

Pick the highest-value ideas, review the risks and agree the POC.

DAYS 31–60

**Prove**

Build and test the proof of concept with your team.

DAYS 61–75

**Plan**

Finish the roadmap, budget, operating model and estimated return.

DAYS 76–100

**Decide**

Review results, train owners and choose what to invest in next.

## HOW WE MEASURE SUCCESS

- **Patient wait times**
- **No-show rate**
- **Admin hours per clinician each week**
- **Patient satisfaction scores**

## HANDLE WITH CARE

- A qualified clinician reviews and signs off anything that affects diagnosis, treatment or medication.
- Patient records stay in approved, secure systems with strict access controls, and out of public AI tools.
- Tell patients they are talking to an assistant, send urgent or clinical questions straight to staff and make reaching a person easy.

## YOUR PROTECTIONS

- ✓ **Fixed fee for an agreed scope**
- ✓ **Written success criteria for the POC**
- ✓ **A named engagement lead**
- ✓ **Weekly progress updates**
- ✓ **Your data rights written into the contract**
- ✓ **Tool advice based on fit, not on what we sell**
- ✓ **No access to live systems without your approval**
- ✓ **Clear exit and data export at any point**
