HOME SERVICES · WHERE AI HELPS

From today's problems to AI-native work

THE PROBLEMS TODAY

01

Quotes that take too long

Customers want a price today, but quotes wait for a site visit or a call back, and many go to a faster competitor.

02

Messy schedules and long drives

Jobs are slotted by hand, so crews criss-cross town, run late and leave gaps in the day.

03

Regular customers who drift away

Recurring cleans or services stop after a skipped visit or a new team member, and nobody follows up in time.

WHERE AI CAN HELP

01	**Quick first quotes**	Turn photos and a short room list into a draft quote for a person to check and send.
02	**Enquiries answered any time**	Answer questions and capture job details on your website or chat, even after hours.
03	**Smarter routes and schedules**	Group jobs by area and keep the same pro with the same customer where possible.
04	**Complaints caught early**	Spot unhappy customers from messages and reviews so the team can put it right quickly.
05	**Paperwork done for you**	Draft job notes, invoices and pro payouts from the day's completed work for a person to approve.

FOR INSPIRATION

AI-native ideas to get you thinking

Examples only, to show what AI-native work can look like. They are not part of the package scope or a promise of what we will build; your POC is agreed with you.

The quote sent before lunch

TODAY

A customer sends photos and waits two days for someone to visit and price the job.

AI-NATIVE

The customer could get a draft price range the same morning, checked by a person, with a visit only if it is needed.

A route day that makes sense

TODAY

The office juggles a whiteboard and phone calls to fit in jobs and cover sick days.

AI-NATIVE

The office could see a suggested day for each crew, grouped by area, and approve or tweak it in a few clicks.

Saving the regular before they leave

TODAY

A long-time customer cancels after a bad visit, and the office only finds out at billing.

AI-NATIVE

A manager could get an alert after a poor review or skipped visit, with a suggested message to win the customer back.
