

ALGOSHRED TECHNOLOGIES

AI-NATIVE LAUNCHPAD · IT & CLOUD

Fewer fire drills. Clearer cloud bills. Happier clients.

An AI-native IT team knows what it runs, starts every incident with the right runbook and explains cloud spend in plain words. Engineers still make the calls; AI does the matching, chasing and write-ups.

01
Know where to start
Find the AI opportunities that matter most to your business.

02
See it work
Pick one idea and we build a working proof of concept with you.

03
Know what comes next
Get a step-by-step roadmap with timeline, budget and estimated return.

FIXED-FEE PACKAGES

Launch **$2,500**

Accelerate **$7,500**

Transform **$19,500**

IT & CLOUD · WHERE AI HELPS

From today's problems to AI-native work

THE PROBLEMS TODAY

01

Inventory that doesn't match reality

Records of servers, licences and cloud resources drift from what is really running, so changes and audits become guesswork.

02

Cloud bills nobody can explain

Spend grows each month and nobody can say which team, client or project drove it, so costs are hard to control.

03

Night calls without context

On-call engineers get woken by alerts and lose time hunting for the runbook, the owner and what depends on the failing system.

WHERE AI CAN HELP

01	**Ticket triage and first replies**	Sort incoming tickets, suggest fixes from past cases and route each one to the right engineer.
02	**Inventory checks**	Compare your records with what is really running and flag gaps for an engineer to confirm.
03	**Cloud cost explanations**	Show which teams or clients drive spend and suggest savings, with a person approving each change.
04	**Incident starter packs**	Open each alert with the runbook, owner, recent changes and affected systems already gathered.
05	**Client review drafts**	Draft monthly service reviews from tickets and system data, ready for an account manager to check.

FOR INSPIRATION

AI-native ideas to get you thinking

Examples only, to show what AI-native work can look like. They are not part of the package scope or a promise of what we will build; your POC is agreed with you.

The 2 a.m. alert

TODAY

An engineer wakes up, logs in and spends the first half-hour working out what is affected.

AI-NATIVE

The alert could arrive with the likely cause, recent changes, affected clients and the matching runbook steps.

The month-end cloud bill

TODAY

Finance asks why the bill went up, and an engineer spends a day digging through cost reports.

AI-NATIVE

A plain-English summary could show what drove the change, by team or client, with savings ideas to review.

The quarterly client review

TODAY

Account managers build review slides by hand the night before the meeting.

AI-NATIVE

A draft review could be ready from the record, showing tickets, uptime and open risks for the manager to refine.

IT & CLOUD · THREE PACKAGES

Your Launchpad

FIXED FEE, AGREED SCOPE	Launch **$2,500** Small businesses 1–50 employees · 3–4 weeks	MOST POPULAR Accelerate **$7,500** Growing companies 51–500 employees · 5–6 weeks	Transform **$19,500** Larger organisations 501+ employees · 8–10 weeks

EVERY PACKAGE INCLUDES

- AI-native consultancy and roadmap
- One proof of concept you choose
- One Burdenoff product free for 3 months
- Budget and return-on-investment model
- Executive readout

WHAT YOU RECEIVE: 8 DELIVERABLES

01 **AI readiness scorecard**
02 **Opportunity map**
03 **Ranked use cases**
04 **One working proof of concept**
05 **AI-native roadmap**
06 **Budget and ROI model**
07 **AI governance starter kit**
08 **Executive readout**

PROOF OF CONCEPT

You choose the proof of concept

Pick one of our suggested ideas for your industry, or bring your own business problem. We check that it fits the package, agree what success looks like in writing, then build it with you.

Good to know: A proof of concept shows an idea working on real or sample data. It is not a production system; we scope the production version with you as a next step.

LAUNCH · $2,500

Help-desk answer assistant

An assistant that suggests fixes for common tickets from your own knowledge base and past cases, so the team resolves them faster.

SUCCESS MEASURE
Time to resolve common tickets

ACCELERATE · $7,500

Cloud spend explainer

Monthly cloud costs from one provider broken down by team or client, with plain-English reasons for changes and savings ideas.

SUCCESS MEASURE
Time to explain the monthly bill and savings found

TRANSFORM · $19,500

Incident and change desk

One view joining alerts, inventory, changes and runbooks that briefs on-call engineers and suggests the next step for each incident.

SUCCESS MEASURE
Time to diagnose incidents and repeat incidents

INCLUDED IN EVERY PACKAGE

Any one product, free for 3 months

Pick any live product from the Burdenoff portfolio and use it free for 90 days.

- One product per organisation
- 90 days in a row from activation
- Agreed seats and usage
- No automatic paid renewal
- Export your data at the end

GOOD FITS FOR IT & CLOUD

AdapterCloud	See and manage clouds, on-prem servers and edge sites from one control plane.
AssetHandler	Keep an accurate record of devices, licences and work orders with a full audit trail.
IntelWatchtower	Monitor systems and detect threats from one place, so on-call engineers start with a clearer picture.

ALGOSHRED TECHNOLOGIES

IT & CLOUD · THE ROAD AHEAD

Your road to AI-native

STEP ONE: THE LAUNCHPAD

NEXT STEPS WE CAN TAKE TOGETHER

Months count from the end of your Launchpad.

NOW · 3–10 WEEKS

Launchpad

Map where tickets, incidents and cloud costs drain time, prove one idea on real data and agree a costed roadmap.

NEXT · MONTHS 1–3

Roll out the first win

Take the proven idea into daily use across more teams or clients, with training and clear owners.

THEN · MONTHS 4–9

Connect the estate

Link tickets, inventory, monitoring and billing data so every engineer works from the same picture.

LATER · MONTHS 10–18

Run AI-native

AI helpers become part of every ticket, change and client review, measured and improved each month.

> The Launchpad is step one: it shows the real value of going AI-native in your own business. Rolling out, scaling and running AI day to day are later steps. You decide if and when to take them, with us or anyone else.

THE FIRST 100 DAYS

Your package takes 3–10 weeks of this. The rest is your team trying the POC, deciding and preparing, with our 30-day follow-up.

DAYS 1–15

Discover

Talk to your people, measure today's costs and check AI readiness.

DAYS 16–30

Prioritise

Pick the highest-value ideas, review the risks and agree the POC.

DAYS 31–60

Prove

Build and test the proof of concept with your team.

DAYS 61–75

Plan

Finish the roadmap, budget, operating model and estimated return.

DAYS 76–100

Decide

Review results, train owners and choose what to invest in next.

HOW WE MEASURE SUCCESS

- **Time to resolve tickets**
- **Time to diagnose incidents**
- **Unexplained cloud spend**
- **Inventory records that match reality**

HANDLE WITH CARE

- Keep client data, passwords and system details out of public AI tools.
- Have an engineer approve any change AI suggests to live systems or access rights.
- Check that client contracts allow their data to be used with AI tools before any pilot starts.

YOUR PROTECTIONS

- ✓ **Fixed fee for an agreed scope**
- ✓ **Written success criteria for the POC**
- ✓ **A named engagement lead**
- ✓ **Weekly progress updates**
- ✓ **Your data rights written into the contract**
- ✓ **Tool advice based on fit, not on what we sell**
- ✓ **No access to live systems without your approval**
- ✓ **Clear exit and data export at any point**
