

AI-NATIVE LAUNCHPAD · MEDICAL DEVICES

Less paperwork. Faster release. Clearer device history.

An AI-native device company gathers complaints in one place, checks records before release and knows where every device is. Qualified people still sign off every quality and safety decision; AI does the sorting and checking.

01
Know where to start
Find the AI opportunities that matter most to your business.

02
See it work
Pick one idea and we build a working proof of concept with you.

03
Know what comes next
Get a step-by-step roadmap with timeline, budget and estimated return.

FIXED-FEE PACKAGES

MEDICAL DEVICES · WHERE AI HELPS

From today's problems to AI-native work

THE PROBLEMS TODAY

01

Complaints scattered everywhere

Reports arrive by email, phone, chat and service notes, so some are logged late and patterns are hard to see.

02

Release records checked by hand

Device history records are reviewed by hand before release, which slows shipments and tires out quality staff.

03

Field actions that stall

When a device needs a fix or recall, finding where each unit is and who owns it takes days of searching.

WHERE AI CAN HELP

01	**Complaint intake and sorting**	Gather complaints from every channel into one queue, sorted by risk, for a person to review and decide.
02	**Pre-checked release records**	Check device history records for missing steps or signatures so reviewers focus only on the gaps.
03	**Change impact checks**	Show which tests, documents and labels a design change touches before it moves forward.
04	**Find every device fast**	Link serial numbers to sites, owners and service history so a field action can start sooner.
05	**Service engineer assistant**	Let engineers ask how to service a model and get the answer from your own approved procedures.

FOR INSPIRATION

AI-native ideas to get you thinking

Examples only, to show what AI-native work can look like. They are not part of the package scope or a promise of what we will build; your POC is agreed with you.

A morning complaint triage list

TODAY

Quality staff read every inbox and service note to find new complaints and judge how serious they are.

AI-NATIVE

Each morning the team could see new complaints in one list, grouped by device and risk, ready for a person to assess.

Release review that starts with the gaps

TODAY

A reviewer reads every page of each device history record before a batch can ship.

AI-NATIVE

The reviewer could open a record with missing entries and odd values already highlighted, then check and sign.

Field action lists ready sooner

TODAY

Staff pull sales, shipping and service files together to work out where affected units went.

AI-NATIVE

A field action could start with a ready list of affected serials, sites and contacts, checked by a person first.

ALGOSHRED TECHNOLOGIES

MEDICAL DEVICES · THREE PACKAGES

Your Launchpad

FIXED FEE, AGREED SCOPE	Launch $2,500 Small businesses 1–50 employees · 3–4 weeks	MOST POPULAR Accelerate $7,500 Growing companies 51–500 employees · 5–6 weeks	Transform $19,500 Larger organisations 501+ employees · 8–10 weeks

EVERY PACKAGE INCLUDES

- AI-native consultancy and roadmap
- One proof of concept you choose
- One Burdenoff product free for 3 months
- Budget and return-on-investment model
- Executive readout

WHAT YOU RECEIVE: 8 DELIVERABLES

01 AI readiness scorecard
02 Opportunity map
03 Ranked use cases
04 One working proof of concept
05 AI-native roadmap
06 Budget and ROI model
07 AI governance starter kit
08 Executive readout

PROOF OF CONCEPT

You choose the proof of concept

Pick one of our suggested ideas for your industry, or bring your own business problem. We check that it fits the package, agree what success looks like in writing, then build it with you.

Good to know: A proof of concept shows an idea working on real or sample data. It is not a production system; we scope the production version with you as a next step.

LAUNCH · $2,500

Procedure and product assistant

An assistant that answers staff and engineer questions from your approved procedures and manuals, with the source shown each time.

SUCCESS MEASURE
Time to find the right procedure or answer

ACCELERATE · $7,500

Complaint intake for one product line

Complaints for one product line gathered from email and service notes, summarised and sorted by risk in your quality system for staff to assess.

SUCCESS MEASURE
Time from report to logged complaint on one line

TRANSFORM · $19,500

Device quality and traceability view

One view linking complaints, release records, changes and installed devices, so quality, service and regulatory teams act together.

SUCCESS MEASURE
Time to start a field action and records needing rework

INCLUDED IN EVERY PACKAGE

Any one product, free for 3 months

Pick any live product from the Burdenoff portfolio and use it free for 90 days.

- One product per organisation
- 90 days in a row from activation
- Agreed seats and usage
- No automatic paid renewal
- Export your data at the end

GOOD FITS FOR MEDICAL DEVICES

ManufacturedOps	Run production work orders and quality checks for your device builds in one place.
AssetHandler	Track installed devices, service visits and audit trails by serial number.
BotManor	Give engineers and support staff answers from your own approved procedures.

ALGOSHRED TECHNOLOGIES

MEDICAL DEVICES · THE ROAD AHEAD

Your road to AI-native

STEP ONE: THE LAUNCHPAD

NEXT STEPS WE CAN TAKE TOGETHER

Months count from the end of your Launchpad.

NOW · 3–10 WEEKS

Launchpad

Map where quality and service time goes, prove one idea on real records and agree a costed roadmap.

NEXT · MONTHS 1–3

Roll out the first win

Take the proven idea into daily use on more product lines, with validation, training and clear owners.

THEN · MONTHS 4–9

Connect quality and service

Link complaints, release records, changes and installed devices so every team sees the same history.

LATER · MONTHS 10–18

Run AI-native

AI helpers become part of daily quality, service and regulatory work, measured and reviewed each month.

> The Launchpad is step one: it shows the real value of going AI-native in your own business. Rolling out, scaling and running AI day to day are later steps. You decide if and when to take them, with us or anyone else.

THE FIRST 100 DAYS

Your package takes 3–10 weeks of this. The rest is your team trying the POC, deciding and preparing, with our 30-day follow-up.

DAYS 1–15

Discover

Talk to your people, measure today's costs and check AI readiness.

DAYS 16–30

Prioritise

Pick the highest-value ideas, review the risks and agree the POC.

DAYS 31–60

Prove

Build and test the proof of concept with your team.

DAYS 61–75

Plan

Finish the roadmap, budget, operating model and estimated return.

DAYS 76–100

Decide

Review results, train owners and choose what to invest in next.

HOW WE MEASURE SUCCESS

- **Time from report to logged complaint**
- **Days to release a finished batch**
- **Time to locate devices for a field action**
- **Records sent back for rework**

HANDLE WITH CARE

- Qualified people make every complaint, release, recall and safety decision; AI only prepares and checks.
- Keep patient and device data private, limit who sees it and keep it out of public AI tools.
- Validate any AI tool used in your quality system before relying on it, and record what it suggested and who approved it.

YOUR PROTECTIONS

- ✓ **Fixed fee for an agreed scope**
- ✓ **Written success criteria for the POC**
- ✓ **A named engagement lead**
- ✓ **Weekly progress updates**
- ✓ **Your data rights written into the contract**
- ✓ **Tool advice based on fit, not on what we sell**
- ✓ **No access to live systems without your approval**
- ✓ **Clear exit and data export at any point**
