PRINTING & PACKAGING · WHERE AI HELPS

From today's problems to AI-native work

THE PROBLEMS TODAY

01

Quotes take too long

Each quote means working out stock, inks, finishing and press time by hand, and slow replies lose jobs.

02

Artwork errors become reprints

Wrong sizes, low-resolution images, bad barcodes or typos slip past proofing, and the whole run is wasted.

03

Changeovers and waste eat margin

Jobs are scheduled one by one, so presses stop often for set-ups and material is wasted.

WHERE AI CAN HELP

01	**Quick quote drafts**	Draft quotes from the customer's request and your price rules, for an estimator to check.
02	**Automatic artwork checks**	Check files for size, bleed, colour, image and barcode problems before proofs go out.
03	**Smarter press scheduling**	Group similar jobs to cut set-ups, and re-plan quickly when a rush job lands.
04	**Print quality checks**	Use cameras to flag colour drift and defects during the run, with a person confirming rejects.
05	**Customer order assistant**	Answer job status, reorder and proof questions any time, from your own systems.

FOR INSPIRATION

AI-native ideas to get you thinking

Examples only, to show what AI-native work can look like. They are not part of the package scope or a promise of what we will build; your POC is agreed with you.

The quote back before lunch

TODAY

An estimator works through a spreadsheet and replies to a quote request a day or two later.

AI-NATIVE

A draft quote could be ready minutes after the request arrives, with the assumptions shown for the estimator to approve.

Artwork problems caught on upload

TODAY

Prepress staff open each file and check it by eye, and some problems slip through.

AI-NATIVE

Each file could be checked as it arrives, with a plain list of fixes sent to the customer before proofing.

The day's press plan

TODAY

A supervisor juggles job tickets on a board and re-plans by hand when things change.

AI-NATIVE

The supervisor could see a suggested run order that groups similar jobs, and adjust it in a few clicks.
