VC & PRIVATE EQUITY · WHERE AI HELPS

From today's problems to AI-native work

THE PROBLEMS TODAY

01

Diligence spread across too many places

Findings sit in a data room, adviser reports and inboxes, so the deal team spends nights stitching the picture together.

02

Portfolio numbers that don't compare

Each company sends its monthly pack in its own format and definitions, so comparing them means rework every month.

03

Quarter-end reporting crunch

Investor reports, side-letter terms and long questionnaires are answered by hand, pulling the team off deals.

WHERE AI CAN HELP

01	**Data room reading**	Summarise documents and flag gaps or possible issues for the deal team to check, with the source shown.
02	**Deal screening**	Sort inbound opportunities against your investment criteria so partners see likely fits first.
03	**Portfolio pack tidy-up**	Pull monthly company packs into one consistent view, flagging numbers that look out of line.
04	**Investor questionnaire drafts**	Draft answers to investor questionnaires from past answers and approved documents, for review.
05	**Value-creation tracking**	Track each company's plan against progress and flag what is slipping before the board meeting.

FOR INSPIRATION

AI-native ideas to get you thinking

Examples only, to show what AI-native work can look like. They are not part of the package scope or a promise of what we will build; your POC is agreed with you.

The first read of a data room

TODAY

Associates spend days opening every file to build a first list of issues.

AI-NATIVE

The team could start with a summary of each folder and a list of open questions, each linked to its source page.

One portfolio view each month

TODAY

An analyst rekeys a dozen company packs into a master spreadsheet.

AI-NATIVE

Packs could be read into one consistent view, with odd movements flagged for the analyst to check with the company.

The long investor questionnaire

TODAY

Investor relations copies answers from old questionnaires and chases colleagues for updates.

AI-NATIVE

A first draft could be built from approved past answers, with new or changed questions highlighted for the team.
