PROFESSIONAL SERVICES · WHERE AI HELPS

From today's problems to AI-native work

THE PROBLEMS TODAY

01

Hours that don't reach an invoice

Work is done but not logged, or logged late, so billable time slips away and month-end turns into a chase.

02

Fixed fees quietly running over

Extra rounds and scope creep eat the margin, and nobody notices until the project is nearly done.

03

An idle bench and overbooked seniors

Some people sit waiting for work while others are stretched, because staffing is planned in a spreadsheet.

WHERE AI CAN HELP

01	**Time capture help**	Suggest time entries from calendars, emails and files worked on, for each person to confirm.
02	**Project budget alerts**	Warn managers when a fixed-fee job or retainer is heading over, while there is still time to talk to the client.
03	**Smarter staffing**	Suggest who is free and has the right skills for new work, so the bench is used and seniors are not overloaded.
04	**Client document chasing**	Send polite reminders for missing client documents and track what has arrived, especially in busy season.
05	**Proposals and reports drafted**	Draft proposals, status reports and summaries from your past work for the team to review and finish.

FOR INSPIRATION

AI-native ideas to get you thinking

Examples only, to show what AI-native work can look like. They are not part of the package scope or a promise of what we will build; your POC is agreed with you.

Month-end without the chase

TODAY

Finance chases people for missing timesheets and holds up the invoices.

AI-NATIVE

Each person could get a draft timesheet built from their week, confirm it in minutes and let invoices go out on time.

The weekly project health check

TODAY

Managers find out a fixed-fee job has run over when the final numbers come in.

AI-NATIVE

Managers could get a short weekly list of projects drifting over budget, with the cause and a suggested next step.

Staffing a new piece of work

TODAY

A resource manager asks around and checks a spreadsheet to find who is free.

AI-NATIVE

A resource manager could see a shortlist of available people with the right skills and the trade-offs of each choice.
