

AI-NATIVE LAUNCHPAD · SCIENCE & RESEARCH

Less admin. Results you can reproduce. More time for discovery.

An AI-native research group finds past work fast, keeps data and results traceable and spends less time on grant admin. Researchers still own the science; AI does the searching, tidying and reporting.

01
Know where to start
Find the AI opportunities that matter most to your business.

02
See it work
Pick one idea and we build a working proof of concept with you.

03
Know what comes next
Get a step-by-step roadmap with timeline, budget and estimated return.

FIXED-FEE PACKAGES

Launch **$2,500**

Accelerate **$7,500**

Transform **$19,500**

SCIENCE & RESEARCH · WHERE AI HELPS

From today's problems to AI-native work

THE PROBLEMS TODAY

01

Results nobody can rebuild

A figure needs redoing for a review, but the data, code and settings behind it are scattered or lost.

02

Grant reporting from memory

Progress and spend reports are rebuilt from spreadsheets and emails, eating days before every deadline.

03

Knowledge that leaves with people

When a student or postdoc moves on, their methods, data and know-how are hard to find.

WHERE AI CAN HELP

01	**Research knowledge assistant**	Ask about past methods, datasets and lab notes and get answers from your own records, with sources.
02	**Literature catch-up**	Summarise new papers in your field each week so the team can decide what to read in full.
03	**Grant report drafting**	Draft progress reports from project records for the lead researcher to check and send.
04	**Data and result tracking**	Record which data, code and settings made each result, so it can be rebuilt on request.
05	**Shared kit and compute planning**	Spot clashing instrument bookings and unused compute so shared resources go further.

FOR INSPIRATION

AI-native ideas to get you thinking

Examples only, to show what AI-native work can look like. They are not part of the package scope or a promise of what we will build; your POC is agreed with you.

The new starter's first week

TODAY

A new student spends weeks asking around to learn how the lab does things.

AI-NATIVE

A new starter could ask an assistant about methods, data and past projects and get answers from the lab's own notes.

The weekly paper digest

TODAY

Researchers skim journal alerts late at night and still miss relevant work.

AI-NATIVE

A short weekly digest could summarise new papers on the group's topics, with links, for people to choose what to read.

The grant report, half-written

TODAY

The lead spends days gathering outputs and spend for a funder report.

AI-NATIVE

A draft could be pulled together from project records, papers and spend, ready for the lead to edit and submit.

SCIENCE & RESEARCH · THREE PACKAGES

Your Launchpad

FIXED FEE, AGREED SCOPE	Launch **$2,500** Small businesses 1–50 employees · 3–4 weeks	MOST POPULAR Accelerate **$7,500** Growing companies 51–500 employees · 5–6 weeks	Transform **$19,500** Larger organisations 501+ employees · 8–10 weeks
Teams we work with	1 team	3 teams	6 teams
AI opportunities assessed	Up to 5	Up to 10	Up to 20
Working proof of concept	1 simple POC	1 connected POC	1 advanced POC
AI-native roadmap	6-month plan	12-month plan	18-month plan

Follow-up review	30 days after	30 days after	30 days after

EVERY PACKAGE INCLUDES

- AI-native consultancy and roadmap
- One proof of concept you choose
- One Burdenoff product free for 3 months
- Budget and return-on-investment model
- Executive readout

WHAT YOU RECEIVE: 8 DELIVERABLES

01 AI readiness scorecard
02 Opportunity map
03 Ranked use cases
04 One working proof of concept
05 AI-native roadmap
06 Budget and ROI model
07 AI governance starter kit
08 Executive readout

PROOF OF CONCEPT

You choose the proof of concept

Pick one of our suggested ideas for your industry, or bring your own business problem. We check that it fits the package, agree what success looks like in writing, then build it with you.

Good to know: A proof of concept shows an idea working on real or sample data. It is not a production system; we scope the production version with you as a next step.

LAUNCH · $2,500

Lab knowledge assistant

An assistant that answers questions from your lab notes, methods and past reports, with links to the source.

SUCCESS MEASURE
Time to find a method, dataset or past result

ACCELERATE · $7,500

Grant report helper

Draft progress reports connected to one project or finance system, for the lead researcher to review.

SUCCESS MEASURE
Hours spent preparing each grant report

TRANSFORM · $19,500

Traceable research results

Link data, code, compute and lab records across groups so any published figure can be traced and rebuilt.

SUCCESS MEASURE
Share of key results that can be rebuilt on request

INCLUDED IN EVERY PACKAGE

Any one product, free for 3 months

Pick any live product from the Burdenoff portfolio and use it free for 90 days.

- One product per organisation
- 90 days in a row from activation
- Agreed seats and usage
- No automatic paid renewal
- Export your data at the end

GOOD FITS FOR SCIENCE & RESEARCH

LabsOfScience	Keep experiments, datasets and protocols in one record the whole group can search.
BotManor	Give researchers an assistant that answers from your own lab notes and methods.
PlanMagnet	Plan projects, milestones and grant deliverables with AI help.

ALGOSHRED TECHNOLOGIES

SCIENCE & RESEARCH · THE ROAD AHEAD

Your road to AI-native

STEP ONE: THE LAUNCHPAD

NEXT STEPS WE CAN TAKE TOGETHER

Months count from the end of your Launchpad.

NOW · 3–10 WEEKS

Launchpad

Map where admin and lost knowledge cost your group most, prove one idea on real data and agree a costed roadmap.

NEXT · MONTHS 1–3

Roll out the first win

Take the proven idea into daily use across the group, with training and clear owners.

THEN · MONTHS 4–9

Connect the research

Link lab records, data, grants and shared resources so every result has a clear trail.

LATER · MONTHS 10–18

Run AI-native

AI helpers become part of daily research work, measured and improved each term.

> The Launchpad is step one: it shows the real value of going AI-native in your own business. Rolling out, scaling and running AI day to day are later steps. You decide if and when to take them, with us or anyone else.

THE FIRST 100 DAYS

Your package takes 3–10 weeks of this. The rest is your team trying the POC, deciding and preparing, with our 30-day follow-up.

DAYS 1–15

Discover

Talk to your people, measure today's costs and check AI readiness.

DAYS 16–30

Prioritise

Pick the highest-value ideas, review the risks and agree the POC.

DAYS 31–60

Prove

Build and test the proof of concept with your team.

DAYS 61–75

Plan

Finish the roadmap, budget, operating model and estimated return.

DAYS 76–100

Decide

Review results, train owners and choose what to invest in next.

HOW WE MEASURE SUCCESS

- **Time to find past methods and data**
- **Hours spent on grant reporting**
- **Key results that can be rebuilt**
- **Use of shared instruments and compute**

HANDLE WITH CARE

- Researchers check every AI summary, draft and finding before it is shared, cited or published.
- Keep participant and partner data private, follow your ethics approvals and keep it out of public AI tools.
- Check that every AI-cited paper exists and says what is claimed, and follow funder and publisher rules on AI use.

YOUR PROTECTIONS

- ✓ **Fixed fee for an agreed scope**
- ✓ **Written success criteria for the POC**
- ✓ **A named engagement lead**
- ✓ **Weekly progress updates**
- ✓ **Your data rights written into the contract**
- ✓ **Tool advice based on fit, not on what we sell**
- ✓ **No access to live systems without your approval**
- ✓ **Clear exit and data export at any point**
