SMALL BUSINESS · WHERE AI HELPS

From today's problems to AI-native work

THE PROBLEMS TODAY

01

Orders scattered across apps and lists

Chat orders, counter sales and bookings sit on separate lists, so things get missed and stock runs out unnoticed.

02

Every question waits for the owner

Customers ask about prices, opening hours and order status, and only the owner knows the answer.

03

Marketing squeezed into a spare hour

Posts, emails and offers get pushed to the evening or skipped, so quiet weeks arrive with no warning.

WHERE AI CAN HELP

01	**Customer question helper**	Answer common questions on chat, email or your website from your own prices and policies.
02	**One list for every order**	Bring orders from every channel into one list, with stock to watch flagged each day.
03	**Marketing in minutes**	Draft posts, emails and offers in your own voice for you to edit and send.
04	**Cash-flow heads-up**	Warn you about thin weeks ahead from bills, bookings and past sales.
05	**Less paperwork**	Read receipts, invoices and timesheets and file them where they belong.

FOR INSPIRATION

AI-native ideas to get you thinking

Examples only, to show what AI-native work can look like. They are not part of the package scope or a promise of what we will build; your POC is agreed with you.

The after-hours customer question

TODAY

A customer messages at 9 p.m. and waits until the owner replies the next day.

AI-NATIVE

An assistant could answer from the shop's own prices and policies straight away and flag anything tricky for the morning.

Closing the day in five minutes

TODAY

The owner adds up sales from the till, the chat app and the notebook each night.

AI-NATIVE

One daily summary could show sales from every channel, what is running low and what needs following up.

A week of posts on Monday

TODAY

Social posts are written last minute, or not at all, when it gets busy.

AI-NATIVE

The owner could approve a week of draft posts and emails on Monday, written around what is in stock.
