

AI-NATIVE LAUNCHPAD · SPACE & EO

Fewer missed passes. Faster delivery. Clearer answers.

An AI-native observation team turns raw data into products faster, spots ground-station trouble early and sorts requests by priority. Experts still confirm every finding; AI does the watching, sorting and first checks.

01
Know where to start
Find the AI opportunities that matter most to your business.

02
See it work
Pick one idea and we build a working proof of concept with you.

03
Know what comes next
Get a step-by-step roadmap with timeline, budget and estimated return.

FIXED-FEE PACKAGES

SPACE & EO · WHERE AI HELPS

From today's problems to AI-native work

THE PROBLEMS TODAY

01

Data that misses the delivery window

Overnight passes stall in processing, and customers get products late while the team works out why.

02

Ground faults that quietly cost passes

An antenna or link issue goes unnoticed until passes are lost, and the cause takes hours to find.

03

Requests competing in an inbox

Imaging and data requests arrive by email and are prioritised by hand, so urgent ones can slip.

WHERE AI CAN HELP

01	**Processing run watch**	Flag stalled or failed processing runs early, with the likely cause and similar past failures.
02	**Ground-station health alerts**	Spot equipment drifting from normal so the team can fix it before passes are lost.
03	**Request sorting**	Read incoming requests, fill in the details and suggest a priority for a planner to approve.
04	**Change spotting**	Highlight likely changes between images, such as floods or new building, for an analyst to confirm.
05	**Archive search in plain words**	Let users find past images and products by asking in everyday language.

FOR INSPIRATION

AI-native ideas to get you thinking

Examples only, to show what AI-native work can look like. They are not part of the package scope or a promise of what we will build; your POC is agreed with you.

The overnight run report

TODAY

An engineer checks each pipeline in the morning to find what failed and why.

AI-NATIVE

A morning summary could list failed runs, the likely cause and the fix that worked last time, ready for review.

The request inbox, sorted

TODAY

A planner reads every request email and keys it into the schedule by hand.

AI-NATIVE

Each request could arrive filled in and ranked by urgency, for the planner to check and approve.

The flood map first look

TODAY

Analysts compare before-and-after images by eye when an event hits.

AI-NATIVE

Likely flooded areas could be outlined within hours, for an analyst to confirm before anything is shared.

SPACE & EO · THREE PACKAGES

Your Launchpad

FIXED FEE, AGREED SCOPE	Launch $2,500 Small businesses 1–50 employees · 3–4 weeks	MOST POPULAR Accelerate $7,500 Growing companies 51–500 employees · 5–6 weeks	Transform $19,500 Larger organisations 501+ employees · 8–10 weeks

EVERY PACKAGE INCLUDES

- AI-native consultancy and roadmap
- One proof of concept you choose
- One Burdenoff product free for 3 months
- Budget and return-on-investment model
- Executive readout

WHAT YOU RECEIVE: 8 DELIVERABLES

01 AI readiness scorecard
02 Opportunity map
03 Ranked use cases
04 One working proof of concept
05 AI-native roadmap
06 Budget and ROI model
07 AI governance starter kit
08 Executive readout

PROOF OF CONCEPT

You choose the proof of concept

Pick one of our suggested ideas for your industry, or bring your own business problem. We check that it fits the package, agree what success looks like in writing, then build it with you.

Good to know: A proof of concept shows an idea working on real or sample data. It is not a production system; we scope the production version with you as a next step.

LAUNCH · $2,500

Operations knowledge assistant

An assistant that answers team questions from your procedures, past incident notes and data guides.

SUCCESS MEASURE
Time to find the right procedure or past fix

ACCELERATE · $7,500

Failed run triage

Alerts on one processing pipeline that group failures, suggest the cause and point to past fixes.

SUCCESS MEASURE
Time from failure to fix on one pipeline

TRANSFORM · $19,500

Request-to-delivery desk

One view tracking every request from tasking to ground station to delivered product, flagging risks to the delivery window.

SUCCESS MEASURE
Products delivered on time and passes lost

INCLUDED IN EVERY PACKAGE

Any one product, free for 3 months

Pick any live product from the Burdenoff portfolio and use it free for 90 days.

- One product per organisation
- 90 days in a row from activation
- Agreed seats and usage
- No automatic paid renewal
- Export your data at the end

GOOD FITS FOR SPACE & EO

CosmicIntersection — Connect tasking, ground-station and processing systems so data flows end to end.

IntelWatchtower — Monitor ground equipment and pipelines and flag problems early.

BigConsole — Show passes, runs and delivery times on dashboards for the whole team.

SPACE & EO · THE ROAD AHEAD

Your road to AI-native

STEP ONE: THE LAUNCHPAD

NEXT STEPS WE CAN TAKE TOGETHER

Months count from the end of your Launchpad.

NOW · 3–10 WEEKS

Launchpad

Map where delays and manual checks cost you most, prove one idea on real data and agree a costed roadmap.

NEXT · MONTHS 1–3

Roll out the first win

Take the proven idea into daily operations, with training and clear owners.

THEN · MONTHS 4–9

Connect the chain

Link tasking, ground stations, processing and the archive so each team sees the same picture.

LATER · MONTHS 10–18

Run AI-native

AI helpers become part of daily work, from request to release, measured and improved each month.

> The Launchpad is step one: it shows the real value of going AI-native in your own business. Rolling out, scaling and running AI day to day are later steps. You decide if and when to take them, with us or anyone else.

THE FIRST 100 DAYS

Your package takes 3–10 weeks of this. The rest is your team trying the POC, deciding and preparing, with our 30-day follow-up.

DAYS 1–15

Discover

Talk to your people, measure today's costs and check AI readiness.

DAYS 16–30

Prioritise

Pick the highest-value ideas, review the risks and agree the POC.

DAYS 31–60

Prove

Build and test the proof of concept with your team.

DAYS 61–75

Plan

Finish the roadmap, budget, operating model and estimated return.

DAYS 76–100

Decide

Review results, train owners and choose what to invest in next.

HOW WE MEASURE SUCCESS

- **Time from pass to delivered product**
- **Passes lost to ground faults**
- **Time to fix a failed processing run**
- **Requests handled on time**

HANDLE WITH CARE

- An expert confirms any change alert or finding before it is shared with customers or authorities.
- Protect sensitive imagery and customer data, and respect any export or licensing limits on its use.
- Take care with detailed images of homes and people, and agree who may see or share them.

YOUR PROTECTIONS

- ✓ **Fixed fee for an agreed scope**
- ✓ **Written success criteria for the POC**
- ✓ **A named engagement lead**
- ✓ **Weekly progress updates**
- ✓ **Your data rights written into the contract**
- ✓ **Tool advice based on fit, not on what we sell**
- ✓ **No access to live systems without your approval**
- ✓ **Clear exit and data export at any point**
