

ALGOSHRED TECHNOLOGIES

AI-NATIVE LAUNCHPAD · SUSTAINABILITY & ESG

Less data chasing. Clearer evidence. Faster reports.

An AI-native sustainability team gathers impact data as work happens, keeps the evidence behind every number and drafts reports from checked data. People still own the claims; AI does the collecting, checking and first drafts.

01
Know where to start
Find the AI opportunities that matter most to your business.

02
See it work
Pick one idea and we build a working proof of concept with you.

03
Know what comes next
Get a step-by-step roadmap with timeline, budget and estimated return.

FIXED-FEE PACKAGES

Launch **$2,500**

Accelerate **$7,500**

Transform **$19,500**

SUSTAINABILITY & ESG · WHERE AI HELPS

From today's problems to AI-native work

THE PROBLEMS TODAY

01

Carbon data buried in bills and job cards

Fuel, power and travel figures sit in invoices, meter readings and spreadsheets, so someone retypes them every quarter.

02

Reporting season becomes an evidence hunt

When auditors or buyers ask where a number came from, the team digs through old emails and folders to prove it.

03

Supplier data that arrives late or not at all

Suppliers send answers late, in different formats or not at all, so value-chain figures end up as rough guesses.

WHERE AI CAN HELP

01	**Read bills and invoices for you**	Pull energy, fuel and travel figures out of documents and suggest an emission factor for each line, for a person to confirm.
02	**Evidence linked to every number**	Keep the source file next to each figure, so anyone can trace a reported number back to where it came from.
03	**Supplier questionnaires that chase**	Send, remind and tidy up supplier answers, and flag the gaps or odd replies for a person to follow up.
04	**First drafts of reports**	Draft report sections and answers to buyer questionnaires from your own approved data, ready for review.
05	**Spot gaps before they become issues**	Flag missing months, sudden jumps or sites that stopped reporting, so the team fixes them early.

FOR INSPIRATION

AI-native ideas to get you thinking

Examples only, to show what AI-native work can look like. They are not part of the package scope or a promise of what we will build; your POC is agreed with you.

The monthly carbon close

TODAY

An analyst spends days copying meter readings and fuel bills into a spreadsheet.

AI-NATIVE

Bills could be read as they arrive, with each figure matched to a site and factor, leaving the analyst to check the flagged lines.

Answering a buyer's questionnaire

TODAY

The team rewrites the same answers for every customer survey from scratch.

AI-NATIVE

A draft could be built from past approved answers and current data, with each claim linked to its evidence for sign-off.

Supplier follow-up without the chasing

TODAY

Someone emails dozens of suppliers by hand and tracks replies in a list.

AI-NATIVE

Reminders could go out on their own, replies could be tidied into one format, and odd answers could be flagged for a person.

SUSTAINABILITY & ESG · THREE PACKAGES

Your Launchpad

FIXED FEE, AGREED SCOPE	Launch $2,500 Small businesses 1–50 employees · 3–4 weeks	MOST POPULAR Accelerate $7,500 Growing companies 51–500 employees · 5–6 weeks	Transform $19,500 Larger organisations 501+ employees · 8–10 weeks

EVERY PACKAGE INCLUDES

- AI-native consultancy and roadmap
- One proof of concept you choose
- One Burdenoff product free for 3 months
- Budget and return-on-investment model
- Executive readout

WHAT YOU RECEIVE: 8 DELIVERABLES

01 AI readiness scorecard
02 Opportunity map
03 Ranked use cases
04 One working proof of concept
05 AI-native roadmap
06 Budget and ROI model
07 AI governance starter kit
08 Executive readout

PROOF OF CONCEPT

You choose the proof of concept

Pick one of our suggested ideas for your industry, or bring your own business problem. We check that it fits the package, agree what success looks like in writing, then build it with you.

Good to know: A proof of concept shows an idea working on real or sample data. It is not a production system; we scope the production version with you as a next step.

LAUNCH · $2,500

Energy bill reader

A simple tool that reads a batch of utility and fuel bills and turns them into a clean, checked table with the source file attached.

SUCCESS MEASURE
Hours spent entering bill data each month

ACCELERATE · $7,500

Supplier data collection assistant

An assistant connected to your supplier list that sends questionnaires, chases replies and flags missing or doubtful answers.

SUCCESS MEASURE
Supplier response rate and time to a complete data set

TRANSFORM · $19,500

Evidence-linked sustainability record

One record that gathers data from finance, operations and suppliers, links every figure to its evidence and drafts report sections.

SUCCESS MEASURE
Time to close a reporting period and audit queries raised

INCLUDED IN EVERY PACKAGE

Any one product, free for 3 months

Pick any live product from the Burdenoff portfolio and use it free for 90 days.

- One product per organisation
- 90 days in a row from activation
- Agreed seats and usage
- No automatic paid renewal
- Export your data at the end

GOOD FITS FOR SUSTAINABILITY & ESG

EcoImpactHub	Track environmental impact and ESG figures across sites in one place.
FluidGrids	Automate bill intake, supplier reminders and data checks with visual workflows.
BigConsole	Give leaders a clear dashboard of impact trends and gaps across the business.

ALGOSHRED TECHNOLOGIES

SUSTAINABILITY & ESG · THE ROAD AHEAD

Your road to AI-native

STEP ONE: THE LAUNCHPAD

NEXT STEPS WE CAN TAKE TOGETHER

Months count from the end of your Launchpad.

NOW · 3–10 WEEKS

Launchpad

Map where your impact data lives and where time is lost, prove one idea on real records and agree a costed roadmap.

NEXT · MONTHS 1–3

Roll out the first win

Put the proven idea into monthly use across more sites, with training and clear data owners.

THEN · MONTHS 4–9

Connect the data

Link finance, operations and supplier data so every figure flows in once and carries its evidence.

LATER · MONTHS 10–18

Run AI-native

Data collection, checks and report drafts run as everyday work, reviewed and improved each quarter.

> The Launchpad is step one: it shows the real value of going AI-native in your own business. Rolling out, scaling and running AI day to day are later steps. You decide if and when to take them, with us or anyone else.

THE FIRST 100 DAYS

Your package takes 3–10 weeks of this. The rest is your team trying the POC, deciding and preparing, with our 30-day follow-up.

DAYS 1–15

Discover

Talk to your people, measure today's costs and check AI readiness.

DAYS 16–30

Prioritise

Pick the highest-value ideas, review the risks and agree the POC.

DAYS 31–60

Prove

Build and test the proof of concept with your team.

DAYS 61–75

Plan

Finish the roadmap, budget, operating model and estimated return.

DAYS 76–100

Decide

Review results, train owners and choose what to invest in next.

HOW WE MEASURE SUCCESS

- **Hours spent gathering data each period**
- **Share of figures linked to evidence**
- **Supplier response rate**
- **Time to finish a report or questionnaire**

HANDLE WITH CARE

- Keep a person responsible for every public claim, so no figure is published without human sign-off.
- Show where estimates are used instead of real data, to avoid overstating progress.
- Agree who can see supplier and site data, and keep it out of public AI tools.

YOUR PROTECTIONS

- ✓ **Fixed fee for an agreed scope**
- ✓ **Written success criteria for the POC**
- ✓ **A named engagement lead**
- ✓ **Weekly progress updates**
- ✓ **Your data rights written into the contract**
- ✓ **Tool advice based on fit, not on what we sell**
- ✓ **No access to live systems without your approval**
- ✓ **Clear exit and data export at any point**
