

AI-NATIVE LAUNCHPAD · TEXTILES & APPAREL

Faster samples. Fewer faults. Orders out on time.

An AI-native mill or garment maker gets samples approved faster, catches faults before cutting and keeps every order on track for its ship date. People still make the calls; AI does the checking and chasing.

01
Know where to start
Find the AI opportunities that matter most to your business.

02
See it work
Pick one idea and we build a working proof of concept with you.

03
Know what comes next
Get a step-by-step roadmap with timeline, budget and estimated return.

FIXED-FEE PACKAGES

TEXTILES & APPAREL · WHERE AI HELPS

From today's problems to AI-native work

THE PROBLEMS TODAY

01

Samples made to the wrong spec

The sample room works from an old tech pack, the buyer rejects it and another round of samples costs days.

02

Faults found after cutting

Mixed dye lots and faulty rolls reach the cutting room, so shade problems show up in finished garments.

03

Ship dates that slip late

Line problems and late materials surface too late, and orders miss their ex-factory date or go by air.

WHERE AI CAN HELP

01	**Tech pack checks**	Check each sample request against the latest tech pack and buyer comments before sewing starts.
02	**Fabric fault spotting**	Use cameras to flag common fabric faults and shade differences, with a person confirming each one.
03	**Line balancing help**	Suggest how to rebalance a sewing line when an operator is absent or a style changes.
04	**Order risk alerts**	Warn early when materials, line output or approvals put an ex-factory date at risk.
05	**Buyer traceability answers**	Draft answers on where an order was made, from yarn to garment, using your own records.

FOR INSPIRATION

AI-native ideas to get you thinking

Examples only, to show what AI-native work can look like. They are not part of the package scope or a promise of what we will build; your POC is agreed with you.

A sample request checked first

TODAY

Merchandisers forward tech packs by email and hope the sample room has the latest one.

AI-NATIVE

Each sample request could be checked against the latest tech pack and buyer comments, with differences flagged.

The daily order risk brief

TODAY

Merchandisers ring the factory and update spreadsheets to see which orders are behind.

AI-NATIVE

A daily brief could list orders at risk of missing their ship date, the reason and options to consider.

Answering a buyer's traceability request

TODAY

Staff spend days collecting yarn, fabric and factory records from emails and files.

AI-NATIVE

A first draft could pull the order's yarn, mill and factory records together, ready for staff to check and send.

TEXTILES & APPAREL · THREE PACKAGES

Your Launchpad

- One proof of concept you choose
- One Burdenoff product free for 3 months
- Budget and return-on-investment model
- Executive readout

WHAT YOU RECEIVE: 8 DELIVERABLES

01 **AI readiness scorecard**
02 **Opportunity map**
03 **Ranked use cases**
04 **One working proof of concept**
05 **AI-native roadmap**
06 **Budget and ROI model**
07 **AI governance starter kit**
08 **Executive readout**

PROOF OF CONCEPT

You choose the proof of concept

Pick one of our suggested ideas for your industry, or bring your own business problem. We check that it fits the package, agree what success looks like in writing, then build it with you.

Good to know: A proof of concept shows an idea working on real or sample data. It is not a production system; we scope the production version with you as a next step.

LAUNCH · $2,500

Merchandising assistant

An assistant that answers team questions from your tech packs, buyer comments and order notes, so details are found faster.

SUCCESS MEASURE
Time to find order and spec details

ACCELERATE · $7,500

Order risk alerts from your order system

Alerts built from your order or production system for one buyer or factory, flagging orders at risk of missing ship dates.

SUCCESS MEASURE
Orders flagged early and on-time ex-factory rate

TRANSFORM · $19,500

Sample-to-shipment control desk

One view linking samples, fabric, line output and shipping across teams that spots risks and suggests next steps.

SUCCESS MEASURE
Sample rounds per style and on-time shipments

INCLUDED IN EVERY PACKAGE

Any one product, free for 3 months

Pick any live product from the Burdenoff portfolio and use it free for 90 days.

- One product per organisation
- 90 days in a row from activation
- Agreed seats and usage
- No automatic paid renewal
- Export your data at the end

GOOD FITS FOR TEXTILES & APPAREL

ManufacturedOps	Run cutting, sewing lines and quality checks for every order in one place.
ArtistryBase	Work on designs and buyer feedback together, so the sample room has the latest version.
CrewFoundry	Track operator skills and training, and share updates with line teams.

TEXTILES & APPAREL · THE ROAD AHEAD

Your road to AI-native

STEP ONE: THE LAUNCHPAD

NEXT STEPS WE CAN TAKE TOGETHER

Months count from the end of your Launchpad.

NOW · 3–10 WEEKS

Launchpad

Map where samples, faults and late orders cost you most, prove one idea on real data and agree a costed roadmap.

NEXT · MONTHS 1–3

Roll out the first win

Take the proven idea into daily use across more buyers, lines or factories, with training and clear owners.

THEN · MONTHS 4–9

Connect sample to shipment

Link design, fabric, production and shipping records so merchandisers and factories share one picture.

LATER · MONTHS 10–18

Run AI-native

AI helpers become part of every order, from first sample to shipment, measured and improved each month.

> The Launchpad is step one: it shows the real value of going AI-native in your own business. Rolling out, scaling and running AI day to day are later steps. You decide if and when to take them, with us or anyone else.

THE FIRST 100 DAYS

Your package takes 3–10 weeks of this. The rest is your team trying the POC, deciding and preparing, with our 30-day follow-up.

DAYS 1–15

Discover

Talk to your people, measure today's costs and check AI readiness.

DAYS 16–30

Prioritise

Pick the highest-value ideas, review the risks and agree the POC.

DAYS 31–60

Prove

Build and test the proof of concept with your team.

DAYS 61–75

Plan

Finish the roadmap, budget, operating model and estimated return.

DAYS 76–100

Decide

Review results, train owners and choose what to invest in next.

HOW WE MEASURE SUCCESS

- **Sample rounds per style**
- **Fabric faults found before cutting**
- **Orders shipped on the ex-factory date**
- **Time to answer a traceability request**

HANDLE WITH CARE

- Keep worker pay, attendance and personal data private, with a person checking any pay question.
- Keep buyer designs and tech packs out of public AI tools and agree who can see them.
- A person checks every traceability or sourcing claim before it goes to a buyer; AI only drafts.

YOUR PROTECTIONS

- ✓ **Fixed fee for an agreed scope**
- ✓ **Written success criteria for the POC**
- ✓ **A named engagement lead**
- ✓ **Weekly progress updates**
- ✓ **Your data rights written into the contract**
- ✓ **Tool advice based on fit, not on what we sell**
- ✓ **No access to live systems without your approval**
- ✓ **Clear exit and data export at any point**
