

AI-NATIVE LAUNCHPAD · TRANSPORT & MOBILITY

Fewer missed runs. Vehicles ready. Riders kept informed.

An AI-native transport operator covers open runs sooner, knows which vehicles are ready and tells riders what is happening before they ask. Controllers still run the service; AI does the watching, matching and messaging.

01
Know where to start
Find the AI opportunities that matter most to your business.

02
See it work
Pick one idea and we build a working proof of concept with you.

03
Know what comes next
Get a step-by-step roadmap with timeline, budget and estimated return.

FIXED-FEE PACKAGES

TRANSPORT & MOBILITY · WHERE AI HELPS

From today's problems to AI-native work

THE PROBLEMS TODAY

01

Open runs at 4 a.m.

Sick calls leave runs uncovered before the morning peak, and controllers phone round while services are cut.

02

Vehicles not ready for pull-out

Defects, failed checks or uncharged electric vehicles are found at the depot door, with too few spares to cover.

03

Riders left guessing during disruption

When a line is suspended or a replacement service runs, updates lag and the phone lines and social channels fill up.

WHERE AI CAN HELP

01	**Shift and run cover**	Match open runs to available, qualified drivers within rest rules, for a controller to confirm.
02	**Vehicle readiness view**	Combine defect reports, checks and charging status into one ready / not ready list before pull-out.
03	**Rider updates**	Draft clear, consistent disruption notices for every channel, approved by control before sending.
04	**Maintenance alerts**	Spot vehicles with repeat faults so they are fixed in a planned slot, not at the roadside.
05	**Faster reporting**	Pull service, reliability and ridership figures into draft board and funder reports for staff to check.

FOR INSPIRATION

AI-native ideas to get you thinking

Examples only, to show what AI-native work can look like. They are not part of the package scope or a promise of what we will build; your POC is agreed with you.

Covering the early-morning gap

TODAY

A controller rings spare drivers one by one before the first buses leave.

AI-NATIVE

Open runs could be offered to qualified, rested drivers by text, with the controller confirming each match.

The pull-out readiness check

TODAY

Depot staff walk the yard and check paper defect cards and charger screens.

AI-NATIVE

A morning list could show which vehicles are ready, which are not and why, with suggested swaps for each block.

One message for every channel

TODAY

Staff type the same disruption update into the website, app and social media.

AI-NATIVE

Control could approve one draft notice that goes out to every channel, updated as the situation changes.

- One Burdenoff product free for 3 months
- Budget and return-on-investment model
- Executive readout

WHAT YOU RECEIVE: 8 DELIVERABLES

01 AI readiness scorecard
02 Opportunity map
03 Ranked use cases
04 One working proof of concept
05 AI-native roadmap
06 Budget and ROI model
07 AI governance starter kit
08 Executive readout

PROOF OF CONCEPT

You choose the proof of concept

Pick one of our suggested ideas for your industry, or bring your own business problem. We check that it fits the package, agree what success looks like in writing, then build it with you.

Good to know: A proof of concept shows an idea working on real or sample data. It is not a production system; we scope the production version with you as a next step.

LAUNCH · $2,500

Driver and depot assistant

An assistant that answers staff questions on procedures, rosters and vehicle checks from your own documents.

SUCCESS MEASURE
Time to find the right procedure

ACCELERATE · $7,500

Run cover board

A cover board for one depot, linked to your scheduling system, that flags open runs and suggests qualified drivers.

SUCCESS MEASURE
Runs covered before pull-out and lost service hours

TRANSFORM · $19,500

Network operations view

One view across depots joining staffing, vehicle readiness, disruption and rider updates for control teams.

SUCCESS MEASURE
Lost service hours and time to inform riders

INCLUDED IN EVERY PACKAGE

Any one product, free for 3 months

Pick any live product from the Burdenoff portfolio and use it free for 90 days.

- One product per organisation
- 90 days in a row from activation
- Agreed seats and usage
- No automatic paid renewal
- Export your data at the end

GOOD FITS FOR TRANSPORT & MOBILITY

MoveTheWheels	Plan routes, vehicles and trips in one place, with AI help.
AssetHandler	Track vehicles, chargers and repair jobs with a full history and audit trail.
CrewFoundry	Keep driver licences, training records and staff updates current in one place.

ALGOSHRED TECHNOLOGIES

TRANSPORT & MOBILITY · THE ROAD AHEAD

Your road to AI-native

STEP ONE: THE LAUNCHPAD

NEXT STEPS WE CAN TAKE TOGETHER

Months count from the end of your Launchpad.

NOW · 3–10 WEEKS

Launchpad

Map where service and staff time is lost, prove one idea on real data and agree a costed roadmap.

NEXT · MONTHS 1–3

Roll out the first win

Take the proven idea to more depots or routes, with training and clear owners.

THEN · MONTHS 4–9

Connect the network

Link scheduling, maintenance, control and rider information so every team shares one picture.

LATER · MONTHS 10–18

Run AI-native

AI becomes part of daily planning, control and rider updates, measured and improved each month.

> The Launchpad is step one: it shows the real value of going AI-native in your own business. Rolling out, scaling and running AI day to day are later steps. You decide if and when to take them, with us or anyone else.

THE FIRST 100 DAYS

Your package takes 3–10 weeks of this. The rest is your team trying the POC, deciding and preparing, with our 30-day follow-up.

DAYS 1–15

Discover

Talk to your people, measure today's costs and check AI readiness.

DAYS 16–30

Prioritise

Pick the highest-value ideas, review the risks and agree the POC.

DAYS 31–60

Prove

Build and test the proof of concept with your team.

DAYS 61–75

Plan

Finish the roadmap, budget, operating model and estimated return.

DAYS 76–100

Decide

Review results, train owners and choose what to invest in next.

HOW WE MEASURE SUCCESS

- **Runs uncovered at pull-out**
- **Vehicles ready on time each morning**
- **Time to inform riders of disruption**
- **Hours spent building monthly reports**

HANDLE WITH CARE

- Keep a person in charge of any decision that affects passenger or staff safety.
- Respect driving-hour and rest rules: AI suggests cover, people confirm it.
- Agree who can see staff, rider and location data, and keep it out of public AI tools.

YOUR PROTECTIONS

- ✓ **Fixed fee for an agreed scope**
- ✓ **Written success criteria for the POC**
- ✓ **A named engagement lead**
- ✓ **Weekly progress updates**
- ✓ **Your data rights written into the contract**
- ✓ **Tool advice based on fit, not on what we sell**
- ✓ **No access to live systems without your approval**
- ✓ **Clear exit and data export at any point**
