

AI-NATIVE LAUNCHPAD · VETERINARY

A calmer front desk. Fewer missed follow-ups. More time for animals.

An AI-native practice answers owners quickly, keeps on top of results and spends less time on notes and reminders. AI handles the sorting and drafting; vets and nurses make every clinical call.

01
Know where to start
Find the AI opportunities that matter most to your business.

02
See it work
Pick one idea and we build a working proof of concept with you.

03
Know what comes next
Get a step-by-step roadmap with timeline, budget and estimated return.

FIXED-FEE PACKAGES

VETERINARY · WHERE AI HELPS

From today’s problems to AI-native work

THE PROBLEMS TODAY

01

A front desk swamped by messages

Calls, texts and web messages pour in, and urgent cases can wait behind simple questions about opening times.

02

Results nobody has called back

Lab results arrive, but busy vets struggle to reach owners quickly, so follow-ups slip and owners worry.

03

Hours spent on clinical notes

Vets write up consults after hours, which adds to long days and slows the next appointment.

WHERE AI CAN HELP

01	**Message triage**	Sort owner messages by urgency so anything worrying reaches a nurse first.
02	**Consult note drafts**	Turn a vet’s spoken summary into a draft clinical note for them to check and sign.
03	**Result follow-ups**	Track lab results that need a call and draft a plain update for the vet to approve.
04	**Reminders that get booked**	Send friendly vaccine, dental and check-up reminders that let owners book in one step.
05	**Wellness plan nudges**	Spot members who have not used their plan and remind them of what is included.

FOR INSPIRATION

AI-native ideas to get you thinking

Examples only, to show what AI-native work can look like. They are not part of the package scope or a promise of what we will build; your POC is agreed with you.

The after-hours message

TODAY

Messages sent overnight wait until the morning, whatever they say.

AI-NATIVE

An assistant could spot a worrying message, point the owner to the emergency line and alert the on-call vet.

The consult note

TODAY

A vet types notes from memory at the end of a full clinic day.

AI-NATIVE

A vet could speak a short summary after each consult and check a tidy draft note before saving it.

The results phone round

TODAY

Nurses work through a paper list of owners to call about results.

AI-NATIVE

Normal results could go out as plain updates once a vet approves them, leaving more time for owners who need a call.

WHAT YOU RECEIVE: 8 DELIVERABLES

01 AI readiness scorecard
02 Opportunity map
03 Ranked use cases
04 One working proof of concept
05 AI-native roadmap
06 Budget and ROI model
07 AI governance starter kit
08 Executive readout

PROOF OF CONCEPT

You choose the proof of concept

Pick one of our suggested ideas for your industry, or bring your own business problem. We check that it fits the package, agree what success looks like in writing, then build it with you.

Good to know: A proof of concept shows an idea working on real or sample data. It is not a production system; we scope the production version with you as a next step.

LAUNCH · $2,500

Front desk message assistant

An assistant that answers common owner questions from your own policies and prices, and flags urgent messages to a nurse.

SUCCESS MEASURE
Routine questions answered without staff time

ACCELERATE · $7,500

Consult note drafting

Connected to your practice system, it turns a vet's spoken summary into a draft note for them to check and save.

SUCCESS MEASURE
Time spent on notes per consult

TRANSFORM · $19,500

Practice follow-up desk

One view across sites that tracks results, reminders and plan use, and drafts follow-ups for staff to approve.

SUCCESS MEASURE
Results followed up on time and reminders booked

INCLUDED IN EVERY PACKAGE

Any one product, free for 3 months

Pick any live product from the Burdenoff portfolio and use it free for 90 days.

- One product per organisation
- 90 days in a row from activation
- Agreed seats and usage
- No automatic paid renewal
- Export your data at the end

GOOD FITS FOR VETERINARY

BotManor	Answer owner questions day and night from your own policies, prices and care guides.
FluidGrids	Automate reminders, result follow-ups and plan renewals with simple visual workflows.
CrewFoundry	Hire staff, track training and continuing education, and keep teams updated across practices.

ALGOSHRED TECHNOLOGIES

VETERINARY · THE ROAD AHEAD

Your road to AI-native

STEP ONE: THE LAUNCHPAD | NEXT STEPS WE CAN TAKE TOGETHER

Months count from the end of your Launchpad.

NOW · 3–10 WEEKS

Launchpad

Map where messages, notes and follow-ups cost your practice most, prove one idea on real data and agree a costed roadmap.

NEXT · MONTHS 1–3

Roll out the first win

Take the proven idea into daily use for the front desk and clinical team, with training and clear owners.

THEN · MONTHS 4–9

Connect the practice

Link messages, records, results and reminders so the whole team works from the same picture.

LATER · MONTHS 10–18

Run AI-native

AI becomes part of daily notes, reminders and owner contact, checked by the team and improved each month.

> The Launchpad is step one: it shows the real value of going AI-native in your own business. Rolling out, scaling and running AI day to day are later steps. You decide if and when to take them, with us or anyone else.

THE FIRST 100 DAYS

Your package takes 3–10 weeks of this. The rest is your team trying the POC, deciding and preparing, with our 30-day follow-up.

DAYS 1–15

Discover

Talk to your people, measure today's costs and check AI readiness.

DAYS 16–30

Prioritise

Pick the highest-value ideas, review the risks and agree the POC.

DAYS 31–60

Prove

Build and test the proof of concept with your team.

DAYS 61–75

Plan

Finish the roadmap, budget, operating model and estimated return.

DAYS 76–100

Decide

Review results, train owners and choose what to invest in next.

HOW WE MEASURE SUCCESS

- **Time to reply to owner messages**
- **Results followed up within a day**
- **Time spent on notes per consult**
- **Reminders that turn into bookings**

HANDLE WITH CARE

- Keep a vet or nurse in charge of every clinical decision; a person checks every AI-drafted note.
- Make sure urgent messages reach a person quickly, day or night; AI must not give medical or dosing advice to owners.
- Protect owner and patient records, and keep them out of public AI tools.

YOUR PROTECTIONS

- ✓ **Fixed fee for an agreed scope**
- ✓ **Written success criteria for the POC**
- ✓ **A named engagement lead**
- ✓ **Weekly progress updates**
- ✓ **Your data rights written into the contract**
- ✓ **Tool advice based on fit, not on what we sell**
- ✓ **No access to live systems without your approval**
- ✓ **Clear exit and data export at any point**
